PRODUCT DESCRIPTION

With the ultra-compact ML4 outdoor lantern, you can take the perfect lighting anywhere you go. Thanks to the latest micro prism technology, the ML4 provides efficient, glare-free and targeted lighting. It is powered by the included rechargeable battery, or one AA alkaline battery. The carabiner snap hook provides flexible usage and attachment options. For example, it can be attached to a backpack to make sure the ML4 is always there when you need it.

- The ultra-compact outdoor light by Ledlenser with state of the art lens technology for glare-free light and high energy efficiency
- Dual Power technology offers extended usage time thanks to AA batteries to back up the included rechargeable battery
- The rechargeable battery can be charged via magnetic charge system, which makes it particularly easy to attach the charging cable
- Carabiner snap hook for flexible usage and fastening
- Optional red light for enhanced maintenance of night vision

PRODUCT SERIES

The Ledlenser Outdoor-Series

Brightness in your Hands. Darkness under control.

Not only do mountain hikers have high standards when it comes to flashlights, headlamps and lanterns – so do campers, geocachers, hunters, anglers and many other outdoors fans. Lights from Ledlenser meet precisely these high standards of quality in terms of functionality and design. We call it "technology engineered in Germany".

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

4) Warranty period of five years from the date of purchase, seven years if the product is registered online on our website. The warranty is valid worldwide and legal warranty rights also apply. It covers defects in materials and workmanship. For the proper functioning of rechargeable batteries a different warranty period of 24 months applies. Excluded from this warranty are the product series "Solidline", Ledlenser K1 and Ledlenser K2. The warranty does not apply to Defects in batteries, holsters, pouches, remote switches, color filters, imprints or surface coatings. The guarantor is Ledlenser GmbH & Co. KG, Kronenstr. 5 - 7, 42699 Solingen, Germany. More information: [ledlenser.com/warranty](https://www.ledlenser.com/warranty)

5) Charging time varies by hardware used.
