Solidline SC2R

PRODUCT DESCRIPTION

Versatile, bright and super-lightweight: the clip light SC2R is the practical tool for anybody who requires flexible light on the go and wants to keep their hands free. Thanks to a clip and a built-in magnet, the SC2R can be attached in various ways, for example to caps, backpacks or metal surfaces. The ball joint of the SC2R further allows the lamp head to be aimed in virtually any direction. In white light mode choose from three dimmer levels, in red light mode choose from constant light and blinking light. The integrated battery pack can easily be recharged at any time with the micro-USB port.

- Flexible clip light with practical ball joint
- Powerful white light and red light LED with five light options total
- MOLLE compatible clip to easily attach to clothing, cap, belt or backpack
- Built-in magnet for attachment to metal surfaces
- Integrated battery pack, rechargeable via micro-USB port

The Solidline-Series

High quality, low prices

Best quality for budget-conscious users of portable lights – this is the concept of the Solidline range designed by Ledlenser. The comprehensive range of flashlights, headlamps and multipurpose lamps employs outstanding technologies and features to supply the optimal light for various applications. To remain easy on your wallet even after the purchase, almost all lamps in this range can either be charged directly or can optionally be upgraded with rechargeable batteries.

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

5) Charging time varies by hardware used.
